**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. In the AMENDMENT AND REQUEST FOR RECONSIDERATION dated April 4, 2004, applicants have canceled claims 1-7 and added new claims 8-27.
2. Claims 8-27 are under consideration in this Office Action.

#### *Claim Rejections - 35 U.S.C. § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 8-12 and 18-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Ter-Sarkesyan et al. or Shibata et al. The teachings of the references have been stated in the previous Office Action.

Applicants' arguments filed April 2, 2004, have been fully considered but are not found to be persuasive. Applicants' position is that the manufacturing process for producing the claimed compositions distinguishes it from the compositions taught by Ter-Sarkesyan et al. and Shibata et al. (JP '363). The Examiner disagrees for reasons of record as supplemented below.

MPEP §2113 states:

"[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." *In re Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).

The claims do not recite any distinctive chemical, physical, or biological properties or characteristics that distinguish the claimed composition from the compositions taught by Ter-Sarkesyan et al. and Shibata et al. (JP '363). Thus, the reference teachings of Ter-Sarkesyan et al. or Shibata et al. anticipate the claimed invention.

***Claim Rejections - 35 U.S.C. § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 13-17 and 23-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ter-Sarkesyan et al. or Shibata et al. The teachings of the references have been stated in the previous Office Action.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the recited compositions and fertilizers having the recited total nitrogen and sulfate anion properties using chromatography and crystallization techniques known in the prior art. Shibata et al. teach *Brevibacterium thiogenitalis* was cultured in a fermentation medium and the glutamic acid crystallized and removed from the fermentation medium. Since, Shibata et al. teach that nitrogen-containing fermentation waste medium (mother liquor) is an excellent fertilizer, one of ordinary skill in the art at the time the invention was made would have been motivated to provide useful fertilizers that have high nitrogen content and low anion content. Thus, the claimed invention was within the ordinary skill in the art to make and use at the time was made, and was as a whole clearly prima facie obvious.

***Conclusion***

7. No claim is allowed.

Art Unit: 1652

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
